

AVaaS (AV As A Service) is a subscription-based payment model for all of your **audio-visual** service and equipment needs.

AVaaS is the new way to pay for AV Technology and Support. It allows your company to operate efficiently while paying a low fixed monthly cost for AV, instead of a high capital expenditure at the time of installation. Our unique solution also provides the peace of mind and freedom to scale your solution or upgrade your technology at any time, without losing the value of an initial investment!

This solution is the best way to leverage a depreciating asset, like AV Hardware. With included service and support, your team will spend less time maintaining, and more time enjoying the benefits of your solution. AVaaS is the smart way to meet your business technology needs.

HOW IT WORKS

1 DESIGN & INSTALL

An AV solution is designed by our expert engineers to best fit your needs and use. The system is installed and integrated in your location. You pay only a monthly fixed cost (5-year term contract required).

2 SERVICE & SUPPORT

Ongoing maintenance and support are included in the monthly rate. The expense for AV is a predictable cost, with no extra service fees. Service is guaranteed. Our remote and on-site technicians are a phone call away!

3 RENEW OR UPGRADE

If the solution no longer meets your needs, you can upgrade the technology at any point during the term. There are no rollover balances and no penalty fees. Your technology changes with your business needs.
